NOTES	AREAS OF STUDY	KEY CONCEPTS	ASSESSMENT METHOD
	Key themes are revisited on a regular basis with most included as part of the curriculum each year. As students mature the nature of what they study in each theme becomes more sophisticated and mature as well. This ensures the curriculum is relevant to the students' stage of life.	The key concepts are focused on personal development as well as preparing students to become active and positive participants in society. Key themes include personal and social development including mental health, citizenship, money management, risk management, and preparation for careers.	Students are not formally assessed as the main themes and topics can be quite personal. They will however receive regular and targeted feedback and their knowledge of Citizenship; money management and some careers topics will be assessed using 'The Big Question' which will be presented at the beginning of each unit and answered at the end of the unit. This will then be assessed using the marking criteria.
